

## Air Distribution & HVAC Equipment

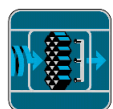

Our highly experienced sales and application team assists our clients in taking a project from an early design concept all the way through delivery and start up. We take the most complex projects and execute them on-time and with close coordination to your job schedule. We partner with the top tier companies in their respective markets to ensure that any project we are involved in will be guaranteed by the best equipment in the industry.

Low voltage variable frequency drives and soft starters

Packaged and split systems 100% OA applications, hot gas reheat, liquid sub-cool coils, energy recovery systems, special coastal coatings

AIR MONITOR CORPORATION

High accuracy airflow measuring stations and transmitters

Complete line of UL rated fire and fire/smoke dampers, AMCA certified louvers, volume dampers, architectural access doors, backdraft and ceiling radiation dampers

Manufacturer of high quality commercial and industrial electric heating units including duct, baseboard, unitary, and explosion proof products

High efficiency variable refrigerant volume heat pumps

Manufacturer of single, dual duct, and fan powered VAV boxes, fan coil units, and air handling units

Manufacturer of complete line of spiral round and flat oval duct systems of various gauge and material types along with sound attenuating products, and acoustic

PENNBARRY™

Manufacturer of high quality ventilation products for industrial and commercial applications, including centrifugal, vane axial, and energy recovery ventilators

Ultraviolet technology for air purification and disinfection

Manufacturer of single, dual duct, fan powered, and underfloor VAV terminals, architectural and clean room diffusers, grilles and registers
